## Rule 45, Federal Rules of Civil Procedure, Parts C &amp; D:

## (c) PROTECTION OF PERSONS SUBJECT TO SUBPOENAS.

(1) A party or an attorney responsible for the issuance and service of a subpoena shall take reasonable steps to avoid imposing undue burden or expense on a person subject to that subpoena. The court on behalf of which the subpoena was issued shall enforce this duty and impose upon the party or attorney in breach of this duty an appropriate sanction which may include, but is not limited to, lost earnings and reasonable attorney's fee.

(2) (A) A person commanded to produce and permit inspection and copying of designated books, papers, documents or tangible things, or inspection of premises need not appear in person at the place of production or inspection unless commanded to appear for deposition, hearing or trial.

(B) Subject to paragraph (d) (2) of this rule, a person commanded to produce and permit inspection and copying may, within 14 days after service of subpoena or before the time specified for compliance if such time is less than 14 days after service, serve upon the party or attorney designated in the subpoena written objection to inspection or copying of any or all of the designated materials or of the premises. If objection is made, the party serving the subpoena shall not be entitled to inspect and copy materials or inspect the premises except pursuant to an order of the court by which the subpoena was issued. If objection has been made, the party serving the subpoena may, upon notice to the person commanded to produce, move at any time for an order to compel the production. Such an order to compel production shall protect any person who is not a party or an officer of a party from significant expense resulting from the inspection and copying commanded.

(3) (A) On timely motion, the court by which a subpoena was issued shall quash or modify the subpoena if it

(i) fails to allow reasonable time for compliance;

(ii) requires a person who is not a party or an officer of a party to travel to a place more than 100 miles from the place where that person resides, is employed or regularly transacts business in person, except that, subject to the provisions of clause (c) (3) (B) (ii) of this rule, such a person may in order to attend

trial be commanded to travel from any such place within the state in which the trial is held, or

(iii) requires disclosure of privileged or other protected matter and no exception or waiver applies, or  
(iv) subjects a person to undue burden.

## (B) If a subpoena

(i) requires disclosure of a trade secret or other confidential research, development, or commercial information, or

(ii) requires disclosure of an unretained expert's opinion or information not describing specific events or occurrences in dispute and resulting from the expert's study made not at the request of any party, or

(iii) requires a person who is not a party or an officer of a party to incur substantial expense to travel more than 100 miles to attend trial, the court may, to protect a person subject to or affected by the subpoena, quash or modify the subpoena, or, if the party in whose behalf the subpoena is issued shows a substantial need for the testimony or material that cannot be otherwise met without undue hardship and assures that the person to whom the subpoena is addressed will be reasonably compensated, the court may order appearance or production only upon specified conditions.

## (d) DUTIES IN RESPONDING TO SUBPOENA

(1) A person responding to a subpoena to produce documents shall produce them as they are kept in the usual course of business or shall organize and label them to correspond with the categories in the demand.

(2) When information subject to a subpoena is withheld on a claim that it is privileged or subject to protection as trial preparation materials, the claim shall be made expressly and shall be supported by a description of the nature of the documents, communications, or things not produced that is sufficient to enable the non-demanding party to contest the claim.

#### **Waste Samples from Productions Facilities (Poultry Houses)**

A total of 18 samples of waste will be collected from each house. The samples will be collected at regular intervals covering the total length of the facility using a zigzag pattern. Both litter and cake samples will be collected. A steel spade will be used to collect the samples and place them in a plastic bag contained inside a 5 gallon bucket. After collection of all the samples, the bag and bucket will be sealed. All sampling equipment and reusable personnel equipment will be decontaminated using water, phosphate free soap and 6 percent bleach.

#### **Soil Samples from Waste Applied Fields**

Equipment and personnel will be transported to the field in a truck or van. At each field between one and four sampling areas will be identified. Each of the sampling areas will be between one and ten acres in size. At each sampling area, a regular grid pattern of 20 sample locations will be established. At each of the 20 sampling locations, individual soil samples will be collected at three depths: 0 to 2 inches, 2 to 4 inches, and 4 to 6 inches. Individual samples will be placed in plastic bags with labels. All sampling equipment and reusable personnel equipment will be decontaminated between fields using water, phosphate free soap and 6 percent bleach.

#### **Rainfall Runoff Samples**

At or near the edge of fields where waste has been applied, rainfall runoff sampling locations will be selected. These locations will typically be low or sloped areas where water will runoff or accumulate. Where runoff water accumulates in a natural depression, the water may be sampled directly from these locations. Rainfall runoff sampling will be conducted from time to time through June 30, 2006 as rainfall events occur.

#### **Groundwater Samples**

Samples of groundwater will be collected using a hydraulic pushed sampling device (probe) mounted on the back of a van or truck. The small diameter probe (usually about two inches in diameter) will be pushed into the subsurface at selected locations on or near the edge of fields where waste has been applied. Groundwater will be collected using a small pump or by inserting a small tube inside the probe. At selected locations (up to three per field), a plastic pipe will be placed in the probe hole to allow repeated sampling of the groundwater. To stabilize the pipe, a small concrete pad will be placed around and over the pipe. If requested by the owner, the pad and pipe will be flush with the ground surface. If the probe cannot penetrate the subsurface, an auger drilling rig may be used. Upon completion the ground will be restored to preexisting condition. Grab sample method will be used to gather data from existing wells or springs using scientifically accepted collection procedures.
